[illegible] 71 Paul R - Texas Club Will Hay griffin recruited Paul as FBI CI. He [illegible] [illegible] disciplined and transferred N.O. where ~~his beat included~~ he handled the French Quarter, inc. subversive investigations. PR doesn't know reason for disciplinary shift but it seems to be serious. PR was told this when Ruby shot LHO The files were destroyed and new ones were created. apparently this was the practise with anything that could have embarrassed the ~~Bur~~ Bureau in its own eyes. Ruby was a Dallas office CI. He would have been known by a number beginning DL and ending with a C. Had he been a security informant it would have ended with an "S". The first step is "~~provisional~~ Potential" represented by the letter "P" a ~~provisional~~ potential security informant would be a PSI, criminal PCI usual probation period for Cs 90 days, for SIs 6 months

Hosty would not have left nasty notes for LHO because they would embarrass Bureau, which would get him fired. However he would well have asked phoney questions designed to defame Marina. PRs face ~~lit~~ lit up when I told him that story. Standard practise and O.K. would not embarrass Bureau

There was a CIA company front on Elm, but PR does not remember its name
